Top 10 ways to innovate the primary school classroom

Along with the more detailed advice and suggestions illustrated here, the key questions to be considered are:

Stimulation: Does your classroom use colour and visual complexity to stimulate without creating confusion?

Individualisation: Through flexibility and ownership can the children interact and resonate with their classroom base?

Naturalness: Does your classroom offer the quality and control of light, heat and fresh air to create a comfortable learning environment?

Tip 1: Provide plenty of daylight, but without glare

Tip 2: Ensure adequate ventilation

Tip 3: Control the temperature

Tip 4: Choose the right level flexibility

Tip 5: Engender ownership

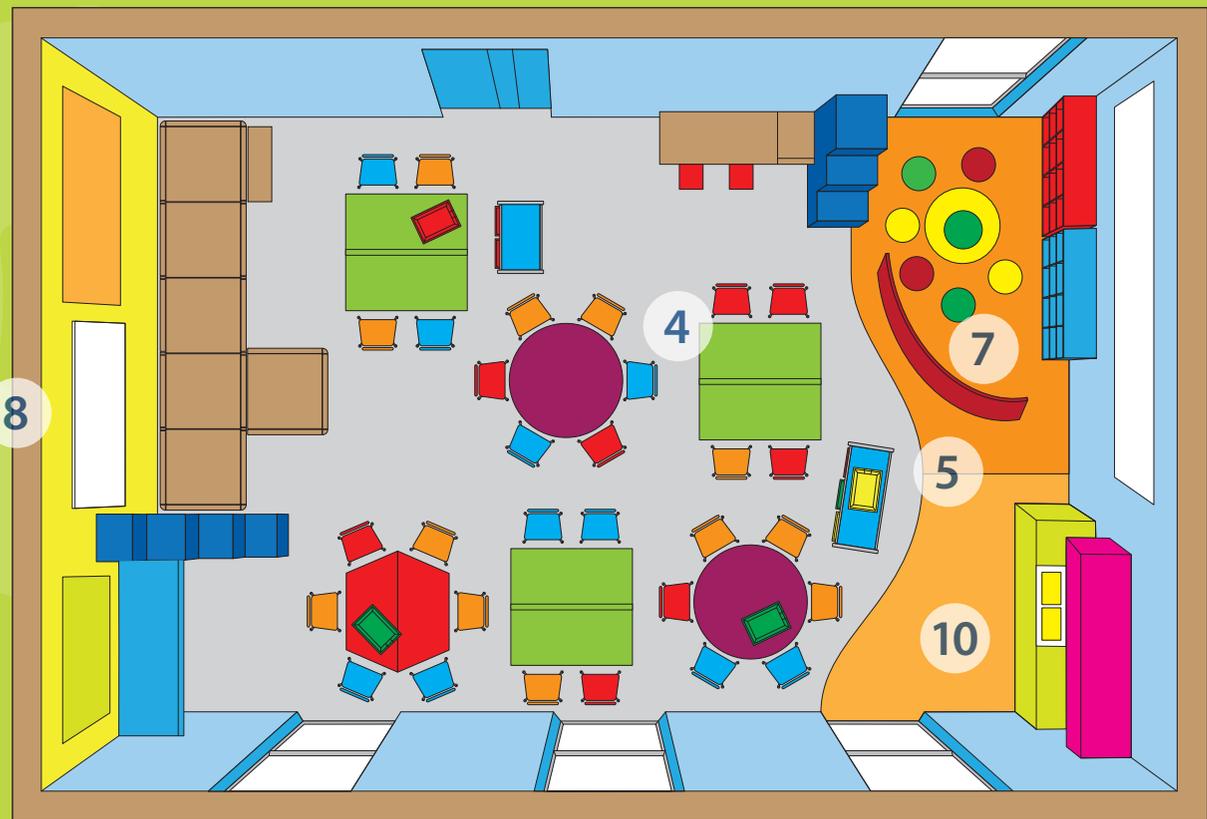

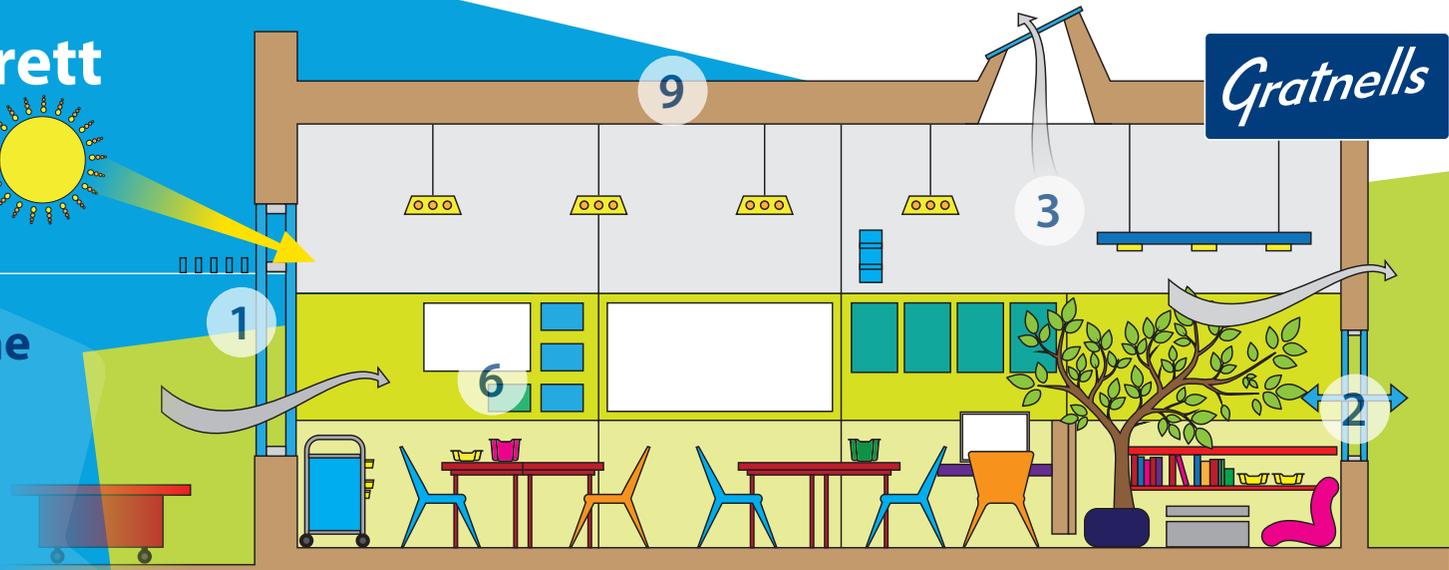

Tip 6: Manage the visual complexity

Tip 7: Use colour carefully

Tip 8: Attack on all fronts!

Tip 9: Don't assume a 'good' school means a 'good' classroom

Tip 10: Remember to see the classroom as another teaching tool

Tips 8, 9 and 10 are whole school initiatives.

Based on an original design by GDST

Ask yourself:

Flexibility

- Can different Learning Zones be created?
- Is there a quiet zone?
- Can different arrangements of furniture be created?
- Is there a variety of furniture?

Ownership

- Do the classrooms have an individual colour theme?
- Is there adequate space for pupils to display work?
- Is there personalised storage space for the pupils?
- Is there good quality, age appropriate furniture?

Connectivity

- Are there class displays in the circulation areas?
- Are the classroom entrances distinctive?
- Can the circulation spaces be multi use/libraries?

Complexity

- Are the class displays on walls too busy or too plain?
- Is the class display material covering too much area (80% or more)?

Colour

- Is the main wall colour calm?
- Has colour been used on the walls to focus attention to the learning wall?
- Are brighter colours used to highlight and stimulate eg furniture/carpets/blinds?

Light

- Is there sufficient natural lighting?
- Is there sufficient artificial lighting?
- Are the light fittings clean and working?
- Are the window areas clear?
- Are there displays on the windows blocking light and views?
- Do the blinds all work?

Temperature

- Does the class overheat?
- Can the heating be controlled from the classroom?
- Is the natural ventilation adequate?
- Can additional external shading be provided?

Air Quality

- Is there a CO² monitor in the class?
- Do the windows open?
- Do the blinds obstruct the ventilation?

Sound

- Are there any external noise issues?
- Are the floors carpeted?
- Does the furniture have rubber feet?

Links to Nature

- Can the children view/access the outside?
- Can planting be provided in or outside of the classroom?
- Is there an external teaching space adjacent?
